Defining CLOFs in Flanders
(BELGIUM)

→ CONTEXT
- Defining Common Learning Outcomes Frameworks (CLOFs)
- Mandatory by law for all BA / MA programs in Flanders
- Describing common minimum levels of competences (insights, skills, attitudes) for every similar program across institutions
- Operationalization of FQF and EQF 6/7
- Used to be in tandem with EQA on program level

→ GOALS
- Inform stakeholders (internal / external)
- Make the (Flemish) Higher Education market more transparent (vertically and horizontally)
- Foster quality culture regarding the design of curricula (constructive alignment)
- Promote LLL
- Facilitate international recognition
- Increase student mobility

→ PROCEDURE (INTERNAL)
- CLOF proposal by project coordinator (# sources)
- Program representatives meeting
- 10 LOs (6 descriptors)
- Active language and student centered!
- Consensus (finding common dominator) and leaving room for differences among programs

→ PROCEDURE (EXTERNAL)
- Stakeholder feedback (advice): students/alumni, international peers and employer representatives
- Responsibility of programs to do follow-up and adjust CLOF if necessary
- Validation by NVAO + publication
- Program is recognized as being BA / MA in FQF

→ EVALUATION
- More than 500 programs
- Reluctance... without resistance
- Lengthy process and sometimes perceived as bureaucratic...
- Some goals realized...
- But impact is still unclear (LLL and mobility)
- ‘Hidden curriculum’: venue to build trust and to share experiences among programs ...
  in times of institutional reviews
- Publicly available information about expected achievements
